Cosmetic Treatments

Boost your smile and your confidence

There cannot be many people who would tell you they would not like a beautiful smile! At Dental 32 we are proud to offer a holistic approach to cosmetic dentistry. We work closely with our patients to assess their concerns and create a treatment plan that will suit their needs and give fantastic results. Our aim is to provide you with a long lasting smile and long term oral health.

We provide a full range of dental treatments to achieve the result you want including:

- Tooth Whitening
- Tooth coloured fillings and composite bonding
- Porcelain veneers and crowns
- Full Mouth Rehab
- Full Mouth Treatment

Multidisciplinary Approach

Because of the mix of expertise we have in the practice we can combine the disciplines of orthodontics, dental implants, gum reshaping and advanced aesthetic veneers, crowns and fillings to ensure the most natural, aesthetic long term results.

We work closely with our dental hygienist throughout your treatment to keep your mouth as healthy as possible to maximise the longevity of your dental treatment.

We work with the very best dental technicians. We communicate with our technicians using high quality photography and encourage our patients to meet with our technicians where possible. This ensures a true team approach in order to provide you with the high quality results that you want!

Tooth Whitening

Professional tooth whitening treatment is non invasive and doesn't damage your teeth. A good professional treatment can leave your teeth up to eight shades lighter.

Why do my teeth look dull?

There are several causes of dull-looking teeth. Over time, the surface enamel can thin, so the yellower dentine beneath shows through. Enamel is porous, which means staining agents can work their way down into the tooth. This means enamel yellows over the years, and absorbs colour from the things we eat and drink, such as red wine and coffee. Smoking is a major culprit.

How long will it last?

That depends on how often you consume 'darkening' things (such as red wine, coffee and smoking). You should keep the whitening trays supplied with your treatment to do a 'top up' treatment every 3 to 6 months to maintain your bright new smile.

Costs:

Take Home	£240 - £300
Individual internal whitening	£95 - £125
Replacement Trays	£100

Tooth coloured fillings and bonding

One of the most common cosmetic procedures we offer involves white fillings and bonding. Bonding is a technique that can totally transform and improve your smile. It is a very skilled process involving the precise use of a moldable material known as dental composite. It is used in a variety of dental procedures.

Tooth coloured fillings are an option that allows for the fillings in your teeth to blend in with the rest of your mouth. They do not stand out. Old amalgam fillings are replaced with tooth coloured fillings that close localised spaces between teeth. Your dentist at Dental 32 will choose the correct material and apply a meticulous technique to get durable results. This is a non-invasive procedure that is relatively simple and should last on average 7-10 years.

At Dental 32 we believe in creating natural-looking smiles that compliment and match your existing teeth. It is about rejuvenating the smile and enhancing the appearance of it. The results create a harmony between the teeth, smile and face that look and feel incredibly natural.

Veneers

A veneer is a new front surface for a tooth, custom made from porcelain. Veneers are extremely versatile and can be used to align crowding or protruding teeth, close gaps or lighten tooth colour. The strength and appearance of our dental porcelain veneers rivals that of natural teeth and they're used to make long lasting changes to the smile.

Dental porcelain veneers can be used to mask a single dark tooth but more often are used as part of smile makeovers. At Dental 32 our smile makeovers start at the consultation where we find out what clients don't like about their teeth and what type of smile is required. In cases where the teeth are very crooked or overcrowded, veneers can be combined with simple orthodontic treatment to align the teeth first. Ensuring the healthiest long term and most aesthetic result for you.

Crowns

Dental Porcelain crowns are used to restore severely broken teeth. Our crowns are all made of porcelain, like veneers, and look every bit as natural, leaving no black line at the gum level as seen with some traditional crowns. Crowns are extremely versatile and can be used to align crowding or protruding teeth, close gaps or lighten tooth colour.

Crowns are used where the tooth is too broken down to restore with a veneer or composite bonding, or to ensure the strength and integrity of a tooth after root canal treatment. We work with the best technicians in the U.K. To ensure an extremely natural and aesthetic long term result.

I can't believe the difference the treatment has made to my life. Before I was so self conscious and always covered my mouth with my hand. Just go for it! Go for a consultation and talk through a treatment plan

Smile Makeover

At Dental 32 we have the unique advantage of being able to offer many different disciplines under the one roof. Only in very exceptional circumstances do we need to refer patients for specialist treatment. This gives us the control of being able to ensure the most seamless treatment and best possible outcome for you. Everything discussed in this brochure can be combined with the following treatments to give you the healthiest, most aesthetic and long term dental care possible:

- Dental implants to improve your confidence by permanently replacing missing teeth.
- Discreet braces and orthodontics to correct any crookedness of your teeth
- Gum reshaping to improve the contour and appearance of your smile
- Natural cosmetic dentures that look exactly like your own natural teeth
- Dental hygiene treatments to get your teeth healthy, bright and in tip top condition!
- Subtle facial aesthetic treatments using injectable anti wrinkle and volumising treatments to freshen your look
