Be the best version of you

Enhance your natural beauty with Facial Aesthetics
by Claire McMullan, now available at Dental 32

The muscles in our face allow us to express emotion, but overtime the repeated use of the same facial muscles can cause lines and wrinkles to occur, particularly to the frown area, forehead and crows feet, which can be ageing and make you look unhappy, even when you're not!

Injectable anti wrinkle treatments using Azzulure to relax facial muscles and the subtle use of Emerval TM fillers, soften facial lines and help you regain natural volume to enhance and rejuvenate your facial appearance.

Dr Claire McMullan, will assess your face and smile to recommend treatments that will subtly enhance your appearance. Your facial aesthetic treatments can be customised to be delivered as a stand alone course of treatment or incorporated as part of a holistic treatment plan with your dental care.

You can be assured of complete confidentiality with any treatment you receive.

You will experience professionalism delivered by a highly trained team in a clinical environment.

As far as anyone else is concerned you will only be visiting the dentist so only you will know your beauty secret.

Enhance your natural
beauty and renew
your confidence.

What treatment can I have with anti wrinkle injections and facial fillers?

Claire is reassuring, discreet and friendly. She has excellent knowledge in facial aesthetics and a great eye for detail that gave me a fresh, natural look. I felt reassured that she didn't want to 'over treat'. Delighted with the results!

Clare

Facial Aesthetics by Claire McMullan can also provide botulinum toxin treatment for headaches, jaw pain and excess sweating.

I have been having treatment for severe tension headaches for about a year now. The treatment involves just a couple of small injections at the temple area. My headaches are now much less frequent and intense. I would highly recommend this to someone who is persistently bothered with headaches

Julian

Wrinkle Relaxing and Volumisation

Anti-wrinkle injections are commonly referred to as 'Botox', short for Botulinum toxin. This is a naturally occurring protein that causes the muscles of the face to relax, consequently smoothing out wrinkles. It is the UK's most popular cosmetic treatment for the removal of wrinkles. We offer versatile treatment options for patients who are looking for a discreet, natural look with minimal swelling and long-lasting results.

Facial Fillers and Lip Enhancement

Has your face lost its fullness and firmness? Do you have deep wrinkles or a facial scar? Maybe you always wanted fuller lips? If so facial fillers could be the perfect solution. We use facial and lip fillers called Restylane. Restylane uses a natural gel called hyaluronic acid to subtly smooth out wrinkles and folds, replace lost volume, and naturally enhance your lips. The result feels soft and natural and only you will know you have had anything done. We consult closely with our patients to offer the right aesthetic result for them and help them put forward the very best version of themselves.

Fee Guide

From £250 per syringe

Full treatment plan and an estimate will be given at your consultation

- ✓ Procedure Time 30 minutes estimated
- ✓ Back To Work 6 - 24 hrs estimated
- ✓ Anaesthetic Topical
- ✓ Full Recovery 48 hours estimated
- ✓ Results Immediately visible
- ✓ Duration of Results 3 - 9 months

The filler treatment Claire carried out has made such a difference to my confidence. I had a deep scar on my cheek that is now barely visible. The wrinkles at the side of my mouth look so much better and my make up lasts longer because it doesn't settle into those lines

Rita

Dr Claire McMullan BDS MJDF
