

## **NHS Registration**

Dental 32 is no longer accepting new NHS patients or registering patients to the NHS once their registration has lapsed.

If you are currently registered as an NHS patient, **you must attend for a dental check-up at least once every two years to maintain your registration.**

If you do not attend at least once every two years, your NHS registration is revoked centrally by the Business Services Organisation (BSO). **This is completely out of control of the practice.**

## **NHS Registration for Children**

Dental 32 are accepting and reregistering children if their parents or guardians are currently registered with us or are joining as new private patients.

Children must also attend the dentist at least once every two years to maintain their NHS registration. Again, this is controlled centrally by the BSO.
